Level 1	Level 1	Level 1	Level 1

Weather of Concern

Northern California

- Another breezy period for Interior Northern California is expected today during the late morning through evening time period.
- These will be northerly winds with the strongest wind gusts in the Southern Sacramento Valley and Northern San Joaquin Valley.

Southern California

- Strengthening northwest to north winds will across a large portion of Southwest California today.
- This morning, damaging wind gusts of 60 to 80 mph will be likely across the mountains, 50 to 70 mph across the Antelope Valley, and between 40 and 60 mph across the Santa Barbara South Coast as well as the valleys of Los Angeles and Ventura counties.
- Gusty northwest to north winds are also expected to impact portions of the Los Angeles and Ventura county coastal areas, with gusts between 35 and 45 mph.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought
- DTF Drought Update dated 04/14/16 attached

Weather

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Medford Weather:

The upper trough that caused the chilly, showery weather across the area yesterday will shift to the east this morning. Isolated showers, mainly near the mountains, early this morning will end by late morning, and leftover clouds will yield to sunshine for most this afternoon. Afternoon temperatures inland from the coast will rise back to near normal levels, which will be about 10-15 degrees higher than yesterday.

Eureka Weather:

High pressure will bring dry and warmer weather conditions to the area through this weekend.

Reno Weather:

Isolated showers east of Highway 95 will gradually diminish this morning as high pressure begins to build over the region. Temperatures will be much cooler with brisk winds into this evening. A significant warm up is expected over the weekend and next week.

San Francisco Weather:

High pressure will build over the region through the weekend and result in a robust warming trend. Cooling is then expected for early next week as an upper level system approaches the west coast. Dry weather conditions will likely persist through the middle of next week.

Sacramento Weather:

High pressure will build through the weekend, allowing for dry weather and a strong warming trend in temperatures. The next potential for significant precipitation arrives late next week.

Weather

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Hanford Weather:

High pressure will build over the area beginning later today and will persist for the next several days. A warming trend to levels well above normal will occur.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Low pressure dropping through the Great Basin will bring strong to locally damaging winds to the region today. An upper level ridge will build into the west coast and surface high pressure will move into Nevada over the weekend. This will bring gusty Santa Ana winds to portions of the region tonight through Sunday morning. There will be a warming trend, with temperatures well above normal this weekend. Warm weather will continue early next week, and then a couple of upper lows moving through the Pacific will bring a cooling trend for midweek.

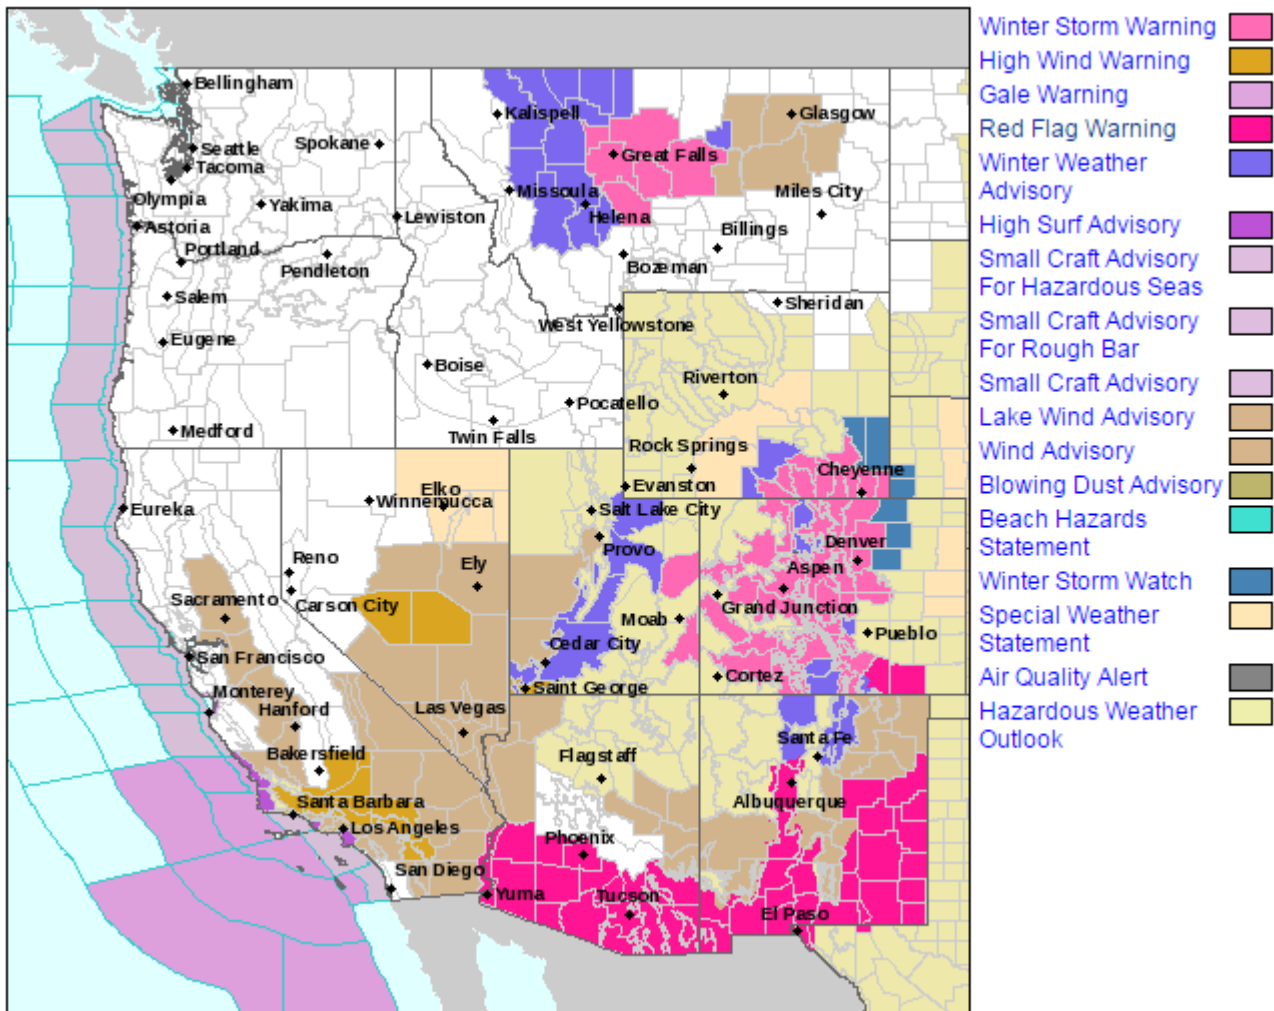

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

A low pressure system moving from the great basin to the southern Rockies will bring periods of gusty northwest to north winds today and north to northeast winds tonight into Saturday. High temperatures for coastal and valley areas will warm into early next week and into the middle of next week for the mountains and deserts. Weak onshore flow will return near the coast on Tuesday and strengthen the latter part of the week as a low pressure system approaches California. Slow cooling will develop near the coast on Tuesday then spread slowly inland through the end of the week.

Southeast California Weather:

A seasonably strong pacific weather system will move through the western United States today and Saturday bringing windy conditions and cooler temperatures. The strongest winds accompanied by blowing dust will occur over southeast California and western Arizona. Warmer and drier conditions will eventually return next week.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on the first Wednesday of each month.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC and will be held once per month.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

CAL OES MISSIONS

New Cal OES Missions

- **2016-LAW-22326, 4/14/2016, 1654 hours**, IERCC advises of a SPOT "SOS" activation at GPS coordinates, 33 03 0.2N 116 31 28W, which plotted on the PCT, West of Granite Mountain in San Diego County. LDO contacted the device's listed emergency contact and relayed the registered owner's (R/O) itinerary to San Diego County Sheriff's Office. SDO advised they had already received a call from a third party and had an airship responding to the area of the given coordinates. **Update:** At 1750 hours, SDO advises R/O and another injured hiker was located at the given coordinates. The R/O was not injured but had activated his SPOT device for the injured hiker. The injured hiker was airlifted to a medical facility with non life threatening injuries and the R/O continued on his trek. LDO updated IERCC. **Mission Closed**

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
